WORK EXPERIENCE

PHP Developer
Mediana Services LLC

04/2021 - Present   *Aktau, Kazakhstan*

Mediana is an IT company in Kazakhstan that are professionally engaged in the creation, implementation and maintenance of information, computer, server and other related digital software products. Founded in 2007 in the city of Aktau.

PROJECTS

User Mediana (https://user.mediana.kz)
- The goal of this project is to create a single sign-on system for all companies internal services (like HR service, Temporary access providing service, Maintenance service etc) via Api Tokens.
- GitHub: https://github.com/Asset1996/user-mediana.

Abiturient Edus (https://abiturient.edus.kz/)
- The customer of this project is the Ministry of Education of the Republic of Kazakhstan. It is to provide college enrollees to apply for admission to colleges online and distribution grants to colleges. The system performs ranking by categories of applicants (test scores, benefits like orphanhood etc). Enrollees can make requests, and college authorities signs the responses.

Secret Mediana (https://secret.mediana.kz)
- Temporary access providing service for Mediana developers and managers. This service provides temporary access sessions for CPanel account for Mediana programmers and managers only. It allows to avoid sharing the login and passwords of CPanel accounts with company employees, which is not good in terms of security.
